## OVERVIEW

The proposed FY2022 – FY2026 Capital Improvement Program (CIP) for the City of Pittsfield invests more than \$221 million in a variety of important capital projects, prioritizing roadway quality, a variety of parks and recreational opportunities, ADA improvements, safe and functional vehicles and equipment for staff, and modern water and wastewater treatment facilities that meet Federal and State requirements.

The proposed General Fund Capital Investment Strategy recommends a commitment of 6.5% of GF revenues for capital projects. However, the availability of significant funding through the Federal government’s American Rescue Plan has allowed the City to reduce GF capital spending in FY2022 below this 6.5% target by nearly \$600,000. In addition, the proposed CIP funds all water and wastewater capital projects from enterprise fund revenues (i.e. water/sewer rates and retained earnings) and reflects the City’s substantial efforts to seek State grant funds and other funding sources for capital projects.

The comprehensive FY2022 – FY2026 CIP proposed in this report is a roadmap for the future. Equally as important, the background supporting materials that will be provided to City staff will be tools for them to annually extend that roadmap into the future to ensure that the City continues to meet its obligations and goals.

## CAPITAL PLANNING: PURPOSE AND PROCESS

According to the Massachusetts Department of Revenue (DOR), a capital plan is a blueprint for planning a community's capital expenditures and "one of most important responsibilities of local government officials." Indeed, a municipality that fails to continually reinvest in its capital assets or fails to plan strategically for capital needs could likely face expensive, emergency expenditures, failure to meet development goals, and even catastrophic safety and health impacts. Furthermore, capital planning is one component of financial management that credit rating agencies consider when assessing credit quality.

The City's Charter and policies provide guidance as to the process and content of the City's Capital Improvement Program. Appendix 1 provides the relevant section of the City's Charter (Section 7-5) and Appendix 2 provides the relevant policy (Capital Planning).

The City's CIP is also guided by the following best practices:

- It should be a comprehensive plan that includes not only City-funded projects, but projects funded through other means as well (e.g., State or Federal funding).
- It should be a multi-year plan, which provides multiple benefits, such as strategic debt management, coordination of projects, and the avoidance of emergency costs.
- It should include a capital investment strategy that extends across the six-year period, allowing for a more accurate projection of future capital costs and annual budgetary impact.

The CIP was developed in three phases: 1) Capital Needs Assessment, 2) Development of the Capital Investment Strategy, and 3) Development of the project plan.

### *Phase 1: Capital Needs Assessment*

Departments were provided with an online request form asking them to describe their proposed project(s), justify each project, prioritize projects, and identify the fiscal year(s) in which the project should be completed. In addition, departments were asked to indicate if non-local funds might be available to support the project and to anticipate the impact of the project on the City's operating budget. For example, savings could be realized if the purchase of new equipment could reduce the cost of future repairs. See Appendix 3 for a copy of the online request form. This was a time-intensive process for staff, which required reviewing asset inventories, finding available data on asset condition and performance, and projecting out work for a six-year period.

After working with department heads to obtain as much detail as possible about each project, the City finance team then reviewed and prioritized projects based on an established series of criteria. The criteria include:

- State/Federal mandate or legal obligation or liability
- Threat to health and safety
- Advancement of adopted plans, studies, and goals
- Department priority
- Impact on service to residents/businesses
- Distribution of benefit
- Economic benefits

- Environmental benefits
- Impact on operating budget
- Availability and likelihood of external funding
- Risk and impact of failure
- Impact on internal effectiveness and/or efficiency

The finance team relies on complete and accurate data from department heads in order to fully assess a project's merits. A project's modest prioritization may be the result of missing or incomplete information about the project and its justification. Such situations underscore the importance of the submission of comprehensive data for each project in order to best reflect the level of importance it deserves. That said, the final decision about inclusion in the CIP may be based on a number of factors, above and beyond the criteria listed above

#### *Phase 2: Development of the Capital Investment Strategy*

There was a review of the City's existing debt profile, authorized and unissued debt, capital leases, stabilization and special funds, and revenue and expenditure forecasts. After reviewing General Fund spending over a multi-year historical period, the team compared capital spending to net budget. Net budget is defined as the total amount raised on the tax rate recapitulation sheet less any excluded debt or capital exclusions, enterprise funds, community preservation funds, and Massachusetts School Building Authority (MSBA) assistance. The goal is to measure annual General Fund capital spending as a percent of the General Fund operating budget to ensure that an appropriate share of General Fund revenues is reinvested through the capital plan.

#### *Phase 3: Development of the Project Plan*

After setting a target investment level, the City leadership, guided by project prioritization and other data provided by Department Heads, generated a list of top-priority projects. For projects to be funded through debt, a conservative projection of debt service was used. The cost of the projects was compared with the target capital spending until the total cost of the FY2022 projects was balanced with the available funding. For the remaining years, the plan shows a deficit which will need to be addressed through each annual cycle. Projects may be removed, postponed, and/or reduced in scope and/or additional resources may be identified.

#### *Managing the Plan in the Future*

Annually, City staff reassess the capital needs of all departments, extending the outlook to include the next year. This annual process allows for the reassessment of the scope, timing, and cost of projects that are included in the current CIP. In addition, the City finance team may update the assumptions and targets in the Capital Investment Strategy in order to determine the resources available for the plan's time period. These assumptions and targets reflect other components of the City's comprehensive financial plan, such as a five-year financial forecast, operating budget priorities, and financial policies.

## Possible Funding Sources

There are a number of ways to finance municipal capital improvement projects. Some of the most common methods are:

### *Local Resources*

- **Municipal Indebtedness:** The most commonly used method of financing large capital projects is general obligation bonds (also known as “GO Bonds”). They are issued for a period of time ranging from 5 to 30 years, during which time principal and interest payments are made. Making payments over time has the advantage of allowing the capital expenditures to be amortized over the life of the project. Funding sources used to pay back the debt can include:
  - **Bonds funded within the tax limits of Proposition 2½:** Debt service for these bonds must be paid within the tax levy limitations of proposition 2½. Funds used for this debt must be carefully planned in order to not impact the annual operating budget.
  - **Bonds funded outside the tax limits of Proposition 2½:** Debt service for these bonds is paid by increasing local property taxes in an amount needed to pay the annual debt service. Known as a Debt Exclusion or Exempt Debt, this type of funding requires approval by a 2/3 vote of the local appropriating authority and approval by a majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications.<sup>1</sup>
- **Capital Outlay / Pay as You Go:** Pay as You Go capital projects are funded with current revenues (typically tax levy or free cash) and unexpended balances in previously approved projects. The entire cost is paid off within one year, so no borrowing takes place. Projects funded with current revenues are customarily lower in cost than those funded by general obligation bonds because there are no interest costs. However, funds to be used for this purpose must be carefully planned in order to not impact the annual operating budget. For this reason, Pay as You Go capital projects are typically lower in value than projects funded by borrowing.
- **Capital Outlay / Expenditure Exclusion:** Expenditure Exclusion projects are similar to Pay as You Go, above, except taxes are raised outside the limits of Proposition 2½ and are added to the tax levy only during the year in which the project is being funded. As with a Debt Exclusion, Expenditure Exclusion funding requires approval by a 2/3 vote of the local appropriating authority and approval by a majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications. Capital outlay expenditures may be authorized for any municipal purpose for which the municipality would be authorized to borrow money.
- **Capital Stabilization Fund:** Local officials can set aside money in a stabilization fund – outside of the general fund - to pay for all or a portion of future capital projects. According to MGL Chapter 40, Sec. 5B, a 2/3 vote is required by City Council to initially set up the fund. Subsequently, a majority vote of City Council is required to appropriate money into the fund and a 2/3 vote is required to appropriate money out of this fund. In addition, City Council, by a 2/3 vote, may dedicate certain revenue streams to a stabilization fund.

---

<sup>1</sup> A debt exclusion is different from a property tax override in that a debt exclusion is only in place until the incurred debt has been paid off. An override becomes a permanent part of the levy limit base.

- **Sale of Surplus Real Property:** Pursuant to Massachusetts General Laws, when real estate is sold, the proceeds must first be used to pay any debt incurred in the purchase of the property. If no debt is outstanding, the funds “may be used for any purpose or purposes for which the town, city, or district is authorized to incur debt for a period of five years or more...except that the proceeds of a sale in excess of five hundred dollars of any park land by a town, city, or district shall be used only by said town, city, or district for acquisition of land for park purposes or for capital improvements to park land” (MGL Chapter 44, Sec. 63).
- **Free Cash:** Free Cash represents the remaining, unrestricted funds from operations of the previous fiscal year, including unexpended free cash from the previous year, actual receipts in excess of revenue estimated on the tax recapitulation sheet, and unspent amounts in budget line items. Unpaid property taxes and certain deficits reduce the amount that can be certified as free cash. The calculation of free cash is based on the June 30 balance sheet, which is submitted by the municipality’s auditor, accountant, or comptroller. Free cash is not available for appropriation until certified by the Director of Accounts.
- **Special Purpose Funds:** Communities also have established numerous “Special Purpose Accounts” for which the use is restricted to a specific purpose, some of which may be investment in department facilities and equipment. There are numerous state statutes that govern the establishment and use of these separate accounts. Examples include ambulance, recreation, cemetery lot sale, and parking revenues.

#### *Federal, State, and Private Grants and Loans*

Other revenue sources may include grants or loans from federal, state, or private sources. For example, federal money is used for bridge and roadway projects listed on the State Transportation Improvement Plan. Private funds are sometimes available from “Friends of...” groups for local libraries or councils on aging. However, the State provides the most opportunities for funding through various programs.

Key potential State funding sources for the City of Pittsfield include:

- **Massachusetts Chapter 90 Roadway Funds:** Each year, the Massachusetts Department of Transportation (MassDOT) allocates funds to cities and towns for roadway construction, maintenance, or improvement. Funds may also be used for other work incidental to roadway work, such as the construction of a garage to house related vehicles, or the purchase of related vehicles, equipment, and tools. Chapter 90 is a 100% reimbursable program. Funding is accomplished through the issuance of transportation bonds and apportioned to municipalities based on three factors: 1) accepted road miles, 2) population, and 3) total employment within the municipal borders. Road miles is the most heavily weighted factor at 58.33%; the others are each weighted at 20.83%.
- **MassWorks Infrastructure Program:** This is a competitive grant program through the Executive Office of Housing and Economic Development that provides capital funds for municipalities and other eligible public entities to complete public infrastructure projects that support and accelerate economic and housing development throughout the Commonwealth and/or address roadway safety concerns.
- **MassDOT Complete Streets:** A Complete Street is one that provides safe and accessible options for all travel modes – walking, biking, transit, and motorized vehicles – for people of all ages and abilities. MassDOT has a program to encourage municipalities to move toward a Complete Streets model. One component of the

program is construction funding after the municipality has passed a Complete Streets Policy and developed a Prioritization Plan.

- **PARC grant program:** Through the Executive Office of Energy & Environmental Affairs, PARC grants are available for the purchase, construction, or renovation of parks and outdoor recreation spaces. Any town with a population of 35,000 or more year-round residents or any city regardless of size is eligible to apply as long as they have submitted an up-to-date Open Space and Recreation Plan. This is a reimbursement program with the typical maximum award being \$400,000. Reimbursement rates are determined by a community's equalized valuation per capita decile rank; The City of Pittsfield was eligible for the maximum reimbursement rate of 70% in FY2021, and this is unlikely to change for the period of the FY2022 – FY2026 CIP.
- **Community Compact IT grant program:** Through the Community Compact Cabinet, this program offers grants of up to \$200,000 for “one-time capital needs such as technology infrastructure, upgrades and/or purchases of equipment or software. Incidental or one-time costs related to the capital purchase such as planning, design, installation, implementation and initial training are eligible.”<sup>2</sup>
- **Green Communities Division grants:** The Department of Energy Resources provides grants through its Green Communities Division intended to reduce energy use through clean energy projects, including vehicle/equipment, building, and school facilities projects. For example, projects may include HVAC upgrades, solar, energy audits, idle reduction technology, lighting retrofits, window/door weatherization, hybrid/electric vehicles, and vehicle charging stations, to name a few.
- **Massachusetts School Building Authority (MSBA):** The MSBA provides funding for school repair and construction via a series of programs. In the School Building Program, projects must be accepted into the process in response to the submission of a Statement of Interest which identifies a facility problem to be solved. Subsequently, the community must appropriate funding for schematic design and later for construction before the MSBA will commit to its share of the project. If accepted, the MSBA determines the amount of reimbursement it will offer based upon community need, with a minimum base rate of 31%. The percent of reimbursement can then be increased based upon three factors: community income factor, community property wealth factor, and community poverty factor. Through the Accelerated Repair Program, the MSBA will fund roof, window, and boiler projects with an expected 18-month completion date. Funding can be provided for multiple projects in a single district in a year. The Major Repairs Program includes roofs, windows, and boilers, but can also include other significant building renovations. Districts are limited to one project per year under the Major Repair Program, but work can be more substantial than under the Accelerated Repair Program.

---

## CAPITAL ASSETS IN PITTSFIELD

The area that became Pittsfield was originally the homeland of the Mohican Tribe. A group of young European men came and began to clear the land in 1743, but threats of Indian raids associated with the conflict of the French and Indian War soon forced them to leave. In 1752 European settlers returned and a village began to grow, which was incorporated as Pontoosuck Plantation in 1753. By 1761 there were 200 residents and the plantation became the Cityship of Pittsfield, named in honor of British Prime Minister William Pitt, who later championed the colonists' cause before the revolution.

By the end of the revolutionary war, Pittsfield's population had expanded to nearly 2,000 residents. While primarily an agricultural area, because of the many brooks that flowed into the Housatonic River, the landscape was dotted with mills that produced lumber, grist, paper and textiles. With the introduction of Merino sheep from Spain in 1807, the area became the center of woolen manufacturing in the United States, an industry that would dominate the community's employment opportunities for almost a century.

The City's population rose slowly into the early 20th century, with significant increases between 1900 and 1930 during the initial expansion of the Stanley Electric Works and its purchase by General Electric. The City's population peaked in the late 1950s/early 1960s at just under 60,000, driven by the success of GE, which at one point had a local workforce of over 13,000. With the closure/relocation of much of the GE work, the population declined. Today the population is estimated to be approximately 43,000.

As the population grew and local government services evolved, the City built infrastructure to provide important services to residents such as roads, water and sewer systems, schools, and parks. These systems remain in place today and must be maintained along with the City's vehicles and other equipment to ensure that City can continue to provide valuable services to its residents. Infrastructure components for which the City of Pittsfield is responsible for include:

### Facilities

The City of Pittsfield occupies and manages a series of buildings and building complexes that serve a multitude of purposes from City Hall to the Berkshire Athenaeum to the Ralph Froio Senior Center. Each of these facilities must be maintained on a regular basis to ensure the safety of workers and the general public. Buildings and the major components therein, such as the HVAC system, roof, flooring, electrical, plumbing, and elevators, have certain lifespans and so major upgrades and/or replacements are necessary in order to maintain the functionality of these facilities.

The most up-to-date insurance schedule values all City-owned facilities and their contents at more than \$400 million. This includes municipal, school, utility, and park/recreation facilities.

<b>PITTSFIELD CITY FACILITIES</b>			
<i>Note: School, Utility, and Park/Recreation Facilities will be discussed in subsequent sections</i>			
<b>Name</b>	<b>Address</b>	<b>Year Constructed/ Renovated</b>	<b>Approx. Sq. Ft.</b>
Airport (Terminal, Hangars)	832 Tamarack Rd		26,489
Berkshire Athenaeum	1 Wendell Ave	1974	45,938
City Hall	70 Allen St	1910	32,090
Lichtenstein Center for the Arts	28 Renne Ave	1927	

Police Station	39 Allen St	1939	25,057
Ralph Froio Senior Center	330 North St	1993/2001	17,700
Captain Villanova Training Center	54 Pecks Rd		
Fire Headquarters (E3)	74 Columbus Ave	1974	16,589
Fire Station (E1)	330 W Housatonic St	1950	3,283
Fire Station (E2)	9 Somerset Ave	1969	6,030
Fire Station (E5) and Training Facility	54 Pecks Rd	1950	6,341 (combined)
Fire Station (E6)	6 Holmes Rd	1963	4,280
Building and Maintenance Administrative Office	81 Hawthorne Ave	1947	11,358
DPS Highway Garage, Salt Shed, etc.	232 W. Housatonic St		38,452
McKay Parking Garage	Depot St	1988	312,508

The City, through its participation in the State's Green Communities program, has received grants for energy efficiency projects. Most recently, in July 2017, the City was granted \$49,543 to fund a heating system conversion from electric to high-efficiency natural gas in the Lichtenstein Art Center and \$250,000 to fund the conversion of all electric heating system to high-efficiency natural gas powered condensing boiler system at the Berkshire Athenaeum. In addition to these projects, the City has converted its streetlight to energy efficient LED, switched to electric vehicles for parking control activities, and plans to replace all the windows within its fire stations which in most cases are original to the buildings.

#### Pittsfield Airport

The Pittsfield Municipal Airport is a regional general aviation airport that is owned and operated by the City of Pittsfield. The airport is under the care, custody and management of a seven-member Pittsfield Municipal Airport Commission. The members of the Commission are appointed by the Mayor. The airport has two lighted asphalt runways and covers 550 acres. Runway 8/26 is 5,791 ft. long while runway 14/32 is 3,496 ft. long. As of January 2021, there were a reported 32 aircraft based at the airport, including 18 single engine planes, 5 multi engine planes, and 9 jet airplanes. Data show an average of 92 aircraft operations per day, of which 59% are locally-based flights, 27% transient general aviation, 11% air taxis, and 3% from military operations.<sup>3</sup>

#### **Information Technology**

The City's core information technology (IT) infrastructure includes a citywide fiber optic network, physical and virtualized servers, high availability clustering, network switches / routers, wireless access points, firewalls and content filters, redundant internet connections, VoIP phones (voice over Internet Protocol) and PoE (power over Ethernet) equipment including building access and surveillance equipment. The City's primary data center is located in City Hall with failover and redundancy located locally in other city facilities.

Inspectional and Health Services	Full Circle Technologies
Police Department	IMC

## Parks and Open Space

Pittsfield is a major regional center for active and passive recreation with a state forest, a ski area, two major lakes, river access points, and many parks and conservation areas. These points serve not only the local residents and people in the county, but frequently visitors from other parts of Massachusetts and out-of-state as well. With this extensive inventory of resources, the City has recently announced its intention to increase its focus on building upon the outdoor recreation economy.

OPEN SPACE FACILITIES OWNED/MANAGED BY CITY OF PITTSFIELD <sup>4</sup>			
Name	Size (acres)	Amenities	Address
Allen Heights Park	2.3	Playground equipment	150 Windsor Ave

## Roads, Bridges and Related Infrastructure

There are approximately 229 miles of roadway in the City, the vast majority of which are City-owned. There are nearly 196 miles of City streets, 17.6 miles of private streets, and 11.5 miles of State roadway maintained by the Massachusetts Department of Transportation (MassDOT). Downtown Pittsfield is at the crossroads of U.S. Route 7 and U.S. Route 20. Other State numbered roadways that pass within City borders include Interstate-90, Route 8, Route 9, and Route 41. Roads are typically classified into three categories:

- **Local streets** comprise approximately 65% of the roads in Pittsfield. These roads provide access to residential properties and generally have lower speed limits.
- **Collector roads** make up about 12% of the City's road network. These roads primarily collect traffic from local streets and funnel it to arterial streets and vice versa.
- **Arterial roadways** comprise around 22% of roads in the City. These roads are designed for mobility, carrying traffic at greater speeds over longer distance than other roads. These streets are typically numbered. These roadways may be maintained by the State and function as part of a regional highway system<sup>5</sup>.

Roads degrade over time through use and as a result of water infiltration, which can cause damage through freeze/thaw cycles common here in New England. Therefore, capital reinvestment as well as ongoing maintenance are necessary.

The Housatonic River flows through the City of Pittsfield, and there are other waterways and railroad tracks that fall within City boundaries. As a result, there many bridges in the City, including 40 bridges and large culverts that are owned by the City of Pittsfield, as evidenced by MassDOT's bridge inventory.<sup>6</sup> The State is responsible for inspecting these bridges, but the City is responsible for repairs and replacement. There are also many smaller municipally-owned culverts in the City.

## School Facilities

Pittsfield's public school system has over 6,000 students with eight elementary schools (Allendale, Capeless, Crosby, Egremont, Morningside, Conte, Stearns, and Williams), two middle schools (Herberg and Reid), and two high schools (Pittsfield High and Taconic High). Public schools in Pittsfield can trace their founding to 1844 when a town meeting was held to establish the community's first school. Administrative offices are located at 269 First Street.

### PITTSFIELD PUBLIC SCHOOL FACILITIES<sup>7</sup>

Facility	Grades	Address	Year Built	Sq. Ft.	Enrollment
Allendale Elementary School	K-5	180 Connecticut Ave	1951	48,133	269
Capeless Elementary School	PK-5	86 Brooks Ave	1951	38,654	167
Conte Community School	PK-5	200 West Union St	1974	69,518	322
Crosby Elementary School	PK-5	517 West St	1962	69,826	321
Egremont Elementary School	K-5	84 Egremont Ave	1951	63,869	414
Herberg Middle School	6-8	501 Pomeroy Ave	1953	108,640	554
Morningside Community School	PK-5	100 Burbank St	1975	69,654	347
Pittsfield High School	9-12	300 East St	1931	203,051	730
Reid Middle School	6-8	950 North St	1953	115,036	525
Stearns Elementary School	K-5	75 Lebanon Ave	1960	40,343	208
Taconic High School	9-12	96 Valentine Rd	1969	189,686	869
Williams Elementary School	K-5	50 Bushey Rd	1957	48,298	254

In addition to the buildings, the athletic fields, parking lots, and roads on the school sites and school vehicles and equipment must be maintained.

## Water System

Pittsfield's first water supply system was a two-mile aqueduct of wooden pipes constructed in 1754. Later, as settlement grew in the area, multiple attempts at an efficient water system were unsuccessful and plagued by challenges. Finally, in 1876, the then-Town replaced their method of cement-lined pipes with cast-iron pipes. In 1892, Pittsfield acquired the waterworks from the Pittsfield Fire District.<sup>8</sup>

Today, the City relies on six surface water reservoirs and two water treatment facilities to supply water to its residents and businesses. All six surface water reservoirs are located outside the City. Cleveland and Sackett

<sup>7</sup> Massschoolbuildings.org retrieved from <http://www.massschoolbuildings.org/node/40236>, October 31, 2019

<sup>8</sup> Waterworkshistory.us retrieved from <http://www.waterworkshistory.us/MA/Pittsfield/>, November 19, 2019

Reservoirs are located in the Town of Hinsdale; Ashley Lake, Lower Ashley Intake Reservoir, Farnham Reservoir, and Sandwash Reservoir are located in the Town of Washington. The two water treatment facilities are located outside the City as well. The Ashley Water Treatment Plant is located in the Town of Dalton, and the Cleveland Water Treatment Plant in the Town of Hinsdale. Water from the surface reservoirs is pumped from the reservoirs and travels via a complex system of pipes and water mains to one of these two treatment plants.

The majority of the City's drinking water is supplied from the Cleveland Reservoir, yielding approximately 7.5 million gallons per day. Flow from the Windsor and Cady Brooks is also diverted into the Cleveland Reservoir watershed. Water from the Cleveland Reservoir is filtered, pH-adjusted for corrosion control, and disinfected at the Cleveland Water Treatment Plant.

The Ashley Reservoir System includes five reservoirs. Ashley Lake Reservoir flows through Ashley Brook to the Ashley Intake Reservoir. Water from the Sandwash Reservoir flows through an aerator, an open canal, and then a semi-closed aqueduct to the Farnham Reservoir. Water from the Farnham Reservoir flows to the Ashley Intake structure then to the Ashley Water Treatment Plant. Water from the Sackett Brook Reservoir also flows via an aqueduct to the Ashley Intake structure then to the Ashley Treatment Plant. The Ashley Water Treatment Plant operates in the same manner as the Cleveland Treatment Plant; water is filtered, pH adjusted for corrosion control and disinfected prior to distribution.<sup>9</sup>

Treated water reaches homes and businesses through a system of water tanks, pumping stations, and pipes. In 2018, some improvements were made to the City's water system. These include: 7 hydrants were replaced; the water main on outer West Housatonic Street was cleaned and lined; the Valentine Road and Plumb Street tanks were cleaned and internally inspected, and; the rehabilitation of the Upper Sackett Reservoir Dam was completed.<sup>10</sup>

## Sewer System

Wastewater from homes and businesses is collected and brought to the treatment plant through a system of pipes and lift stations. Currently, sewer services are available to approximately 95% of Pittsfield's residents. The plant also treats wastewater from Dalton, Hinsdale and sections of Lenox. According to the City, 12 million gallons of wastewater flow are treated per day. The wastewater treatment plant is located on Holmes Rd at the Lenox border. The plant processes the raw sewage through a primary and secondary treatment system and discharges the treated effluent to the Housatonic River.

The City is currently engaged in a \$60+ million upgrade to the treatment plant in order to meet Federal Environmental Protection Agency (EPA) effluent standards, reducing phosphorus and aluminum levels, as well as to meet the City's National Pollutant Discharge Elimination System (NPDES) Permit and EPA Consent Order. The upgrades are intended to improve water quality in the City, the surrounding Housatonic River Watershed, as well as in downstream water bodies. The upgrade has four necessary components: Tertiary Treatment Upgrade; Sludge Dewatering Upgrade; Biological Process Upgrade; and Secondary Clarifiers Upgrade.<sup>11</sup> This project is expected to be completed by January 2022.

## Storm Water System

In order to protect the water quality in the region and comply with Federal EPA and Massachusetts Department of Environmental Protection (MassDEP) regulations, the City has developed a storm water management program. Part of this program is to ensure that well-maintained infrastructure collect and channel runoff appropriately. While the City is only responsible for maintaining infrastructure on public property, there is also storm water infrastructure on private property throughout the City.

Pittsfield's physical storm water infrastructure consists of curbing, gutters, storm drains, catch basins, pipes, manholes, culverts, outfalls, reservoirs, and other components that function together to collect and convey storm water to larger bodies of water.

## Vehicles and Equipment

City staff use an array of vehicles and equipment to complete their tasks on a daily basis. According to the City's insurance schedules, there are approximately 380 vehicles owned the City, worth nearly \$23.25 million when new.

The Department of Public Services has the most at more than 140 vehicles, ranging from trailers and pickup trucks to street sweepers and loaders. An additional 40 or so vehicles are used by the Department of Public Utilities to provide water and sewer service. Many other smaller, handheld pieces of equipment (e.g. asphalt compactors, shovels, and other grounds maintenance tools) are used daily by public works/utilities staff in the execution of their duties.

The public safety departments also utilize a significant inventory of vehicles and equipment, including motorcycles, police cruisers, pickup trucks, fire engines, and fire ladder trucks. Police and Fire also have other small equipment and tools needed for their mission, such as generators and trailers.

Pittsfield Public Schools also owns its bus fleet, transit vans, and several sedans/SUVs.

## **CAPITAL NEEDS ASSESSMENT**

The first phase of the capital planning process is to assess the capital needs of all City Departments, including Pittsfield Public Schools. In 2020, the City performed a comprehensive capital needs assessment that asked all City departments to describe their proposed project(s), justifying and describing each proposed project and identifying the fiscal year(s) in which the project should be completed. In addition, departments were asked to indicate if non-local funds might be available to support the project and to anticipate the impact of the project on the City's operating budget. For example, the savings that could be produced by purchasing and new piece of equipment through reduced annual repairs.

This was a time-intensive process for staff, which required reviewing asset inventories, finding available data on asset condition/performance, and projecting out work for a six-year period. The City relies heavily on each department's professional assessment of scope and urgency of its own capital needs. The information provided about each project helps the finance team organize the projects based on their merits in such a way as to facilitate appropriate and fair decisions about the proposed spending plan.

This cycle, departments were asked to review the FY2021 – FY2026 CIP to propose any necessary edits to project scope, cost, timing, etc. In addition, departments were given access to the online form to submit any new capital needs that had arisen since the prior comprehensive capital needs assessment. This edited and new projects were then incorporated into the planning process by the City's finance team.

## SUMMARY OF GENERAL FUND CAPITAL INVESTMENT STRATEGY

The City of Pittsfield's CIP is guided by a comprehensive investment strategy which was developed based on an analysis of a variety of financial data, including the existing debt profile, existing capital leases, authorized and unissued debt, as well as past operating budgets. The Mayor and Finance Director, working closely with the City's financial advisor as necessary, develops and annually reviews the proposed General Fund (GF) Capital Investment Strategy that targets 6.5% of general fund revenues for capital investment. In addition, the strategy calls for all water and wastewater projects to be fully funded from Enterprise Fund revenues and for the City to continue to be aggressive in seeking grants and other non-tax funding sources.

The table below summarizes the City's historical GF capital investments. Over the past three fiscal years, the City has invested an average of 5.48% of GF revenues in capital projects.

	FY2019	FY2020	FY2021 est.
<b>Committed Capital Investment</b>			
Existing Net General Fund Non-Excluded Debt	6,721,355	8,955,889	9,084,409
Authorized & Unissued General Fund Non-Excl. Debt	0	0	0
Capital Leases	15,000	15,000	0
General Fund Pay as You Go Spending	422,210	593,169	600,000
<b>Total Committed Capital Investment</b>	<b>7,158,565</b>	<b>9,564,058</b>	<b>9,684,409</b>
Net Budget	154,761,923	161,566,182	164,128,051
Capital Spending as % of Net Budget	4.63%	5.92%	5.90%

The table on the following page details the financial components of the FY2022 – FY2026 CIP. Using the 6.5% spending target, and taking into consideration the funds the City has already committed through previously issued debt as well as any debt that was previously authorized and is projected to be issued during the five-year period, the FY2022 capital budget is balanced and shows a more than \$580,000 surplus. The remaining years of the plan currently show a deficit, which will be addressed annually when the City goes through its process of evaluating needs and resources for the capital budget. Due to the significant cost of the Police Headquarters project (\$55 million), associated debt service is broken out separately and the surplus/deficit is shown with and without taking into consideration the debt for this project.

**General Fund Capital Investment Strategy**

	2022	2023	2024	2025	2026
<b>Committed Capital Investment</b>					
Existing Net GF Non-Excluded Debt	8,990,559	8,897,133	9,143,982	9,002,665	8,709,349

<sup>^</sup>Net budget is projected to grow 2.5% in FY22 and 3.5% annually thereafter

\*Surplus/Deficit is compared to "Target Capital Spending Amount"

## FY2022 - FY2026 CIP: PROJECT PLAN

The City of Pittsfield’s proposed FY2022 - FY2026 capital improvement program invests \$221.8 million in more than 100 projects across the general and enterprise funds, paid for through a variety of sources, including local tax levy, local indebtedness, State grant funds, Federal relief funds (American Rescue Plan, or ARP funds), and private donations. These capital investments will allow the City to maintain and improve its capital assets, which represent hundreds of millions of dollars of taxpayer investment.

Projects are also spread across different functional units of City government. However, slightly more than 47% of all projects and more than half of the total cost of all projects fall under the management of the Departments of Public Services and Public Utilities, as is expected due to the high cost and variety of capital assets such as roads, vehicles, water/wastewater treatment facilities, etc. under those departments’ custody. In addition, about 9% of projects and nearly 27% of costs are attributable to the Police Department, largely due to the \$55.5 million for designing and building a new police headquarters. Projects in municipal buildings and at City open space and recreation facilities represent about one-third of all projects and about 38% of total cost.

The table below provides the detail of cost and project count by department.

## FY2021 – FY2026 CIP Projects by Department

Department	# of Projects	% of Total	Cost of Projects	% of Total
Airport	4	3.2%	\$11,602,000	5.2%
Building Maintenance	12	9.6%	\$6,781,000	3.1%
Community Development	21	16.8%	\$11,256,321	5.1%
Dept of Public Services	33	26.4%	\$32,736,935	14.8%
Dept of Public Utilities	26	20.8%	\$88,688,000	40.0%
Fire Dept	6	4.8%	1,875,000	0.8%
Inspections	1	0.8%	139,000	0.1%
IT*	6	4.8%	5,640,000	2.5%
Library	3	2.4%	452,300	0.2%
Police Dept	11	8.8%	59,498,000	26.8%
Public Schools	2	1.6%	3,150,000	1.4%
<b>Grand Total</b>	<b>125</b>	<b>100.0%</b>	<b>\$221,818,556</b>	<b>100.0%</b>

\*One project, spread out across several departments, was located in the IT department for organizational purposes.

The table below shows the total spending by funding source and fiscal year in the proposed FY2022 – FY2026 CIP. The first row represents the American Rescue Plan – federal funds related to investment in the wake of the COVID-19 pandemic, or approximately 5% of all CIP project costs. The next two rows, General Fund PayGo and Debt, represent the City’s committed funds and total nearly \$102 million. This represents approximately 46% of the total CIP project costs. Nearly 40%, or about \$86.9 million, would come from water and sewer revenues. A total of 5.6% would come from other sources, such as State Chapter 90 roadway funds, Community Preservation Act funds, parking revenues, State grant funds, and private donations. Some of these funding sources are competitive, so it is not guaranteed that the City will receive the funding.

## FY2021 – FY2026 CIP Spending by Funding Source and Fiscal Year

Funding Source	# of Projects	% of Total	Cost of Projects	% of Total
American Rescue Plan	21	16.8%	\$10,793,621	4.9%
General Fund Pay Go	19	15.2%	\$3,042,000	1.4%
General Fund Debt	52	41.6%	\$98,714,000	44.5%
Enterprise Fund Debt	26	20.8%	\$86,887,000	39.2%
Other Funding Sources*	7	5.6%	\$22,381,935	10.0%
<b>Grand Total</b>	<b>125</b>	<b>100.0%</b>	<b>\$221,818,556</b>	<b>100.0%</b>

\*Seven projects are exclusively funded by other sources and 10 are funded through combination of General Funds and other sources.

A full project listing for the FY2022 – FY2026 CIP can be found on the following pages.

Appendix 3: Online Capital Project Request Form

**Appendix 1: Section 7-5 Capital Improvement Program, City of Pittsfield Charter**

“SECTION 7-5 CAPITAL IMPROVEMENT PROGRAM.

(a) Submission - The mayor shall submit a capital improvement program to the city council at least 60 days before the start of each fiscal year. The capital improvement program shall include:

- (1) A general summary of its contents;
- (2) A list of all capital improvements proposed to be undertaken during the next five years, with supporting information as to the need for each capital improvement;
- (3) Cost estimates, methods of financing and recommended time schedules for each improvement; and
- (4) The estimated annual cost of operating and maintaining each facility and piece of major equipment involved.

This information shall be annually revised by the mayor with regard to the capital improvements still pending or in the process of being acquired, improved or constructed.

(b) Public Hearing - The city council shall publish in at least one newspaper of general circulation in the city a notice stating: (i) the times and places where entire copies of the capital improvements program are available for inspection by the public; and (ii) the date, time and place of a public hearing on the plan to be held by the city council not less than 14 days after publication of the notice.

(c) Adoption - At any time after the public hearing but before the last day of the last month of the current fiscal year, the city council shall by resolution adopt the capital improvements program, which may be amended, provided that each amendment shall be voted on separately and that an increase in the capital improvements program as submitted shall clearly identify the method of financing to accomplish the proposed increase.”

**Appendix 2: “Capital Planning,” City of Pittsfield Financial Policies Manual**

## CAPITAL PLANNING

## PURPOSE

The goal of this policy is to provide a means for planning the maintenance and improvement of Pittsfield’s capital assets and infrastructure, whose upkeep is vitally important to the delivery of quality services. It outlines guidance for reviewing, planning, and coordinating capital improvements so as to promote a systematic acquisition and replacement schedule and to ensure that, given limited resources, the City’s capital needs are met.

## APPLICABILITY

This policy sets guidelines and expectations for all City departments in planning for and requesting capital projects, and outlines consensus budgetary goals for the Mayor and City Council.

## POLICY

The City shall maintain its physical assets by providing funding to protect its capital investments and minimize future maintenance and replacement costs. The City sustains a capital improvement program (CIP) overseen by the Finance Director and Mayor to identify and prioritize projects, analyze funding, and create a long-term financial plan achievable within the City’s budget limitations. The City shall sustain a six-year plan for capital improvements, which will be updated annually. Included in the CIP shall be those projects that will provide and preserve the infrastructure needed to achieve the highest levels of public services and quality of life possible within the available financial resources. The City will emphasize preventive maintenance as a cost-effective approach to capital reinvestment and replace exhausted goods as necessary.

## A. Definition of a CIP Project

A capital improvement is a tangible asset or project estimated to cost over \$10,000 and estimated to have or to extend, five or more years of useful life. These include:

- Real property acquisitions, construction, and long-life capital equipment
- Major renovations of existing capital items that extend their useful lifespans, as distinguished from normal operating expenditures
- Major improvements to physical infrastructure, including streets, sidewalks, storm water drains, water distribution systems, and sanitary sewer systems
- Planning, feasibility studies, and designs for potential capital projects
- Items obtained under a long-term lease
- Bulk purchases of similar items, like software or furniture, with expected useful lifespans of five or more years that, when aggregated, have total costs exceeding the capital threshold

## B. Evaluation of CIP Projects

The Finance Director in consultation with the Mayor and department heads will evaluate and prioritize capital projects using the below criteria:

- Required by state or federal laws or regulations
- Supports adopted plans, goals, objectives, and policies
- Stabilizes or reduces operating costs
- Replaces a clearly obsolete facility or makes better use of an existing facility
- Maintains or improves productivity or existing standards of service
- Eliminates a hazard to public health and safety
- Directly benefits the City's economic base by increasing property values
- Provides new programs having social, cultural, historic, economic, or aesthetic value
- Uses outside financing sources, such as grants

#### C. Multiyear Capital Plan

In accordance with the City Charter, the Finance Director will annually update and propose for adoption by the Mayor and City Council a six-year capital improvement program, including the upcoming fiscal year's capital improvement budget and a four-year projection of capital needs and expenditures that details their estimated costs, descriptions, and anticipated funding sources.

#### D. Capital Financing

Long-term debt is an appropriate funding source for certain types of projects; however, current revenues should be used for assets with short useful lifespans and/or with estimated costs of \$25,000 or less. The City will strive to budget three to four hundred thousand of the general fund operating budget, net of debt, on capital investment allocations annually.

The CIP shall be prepared and financed in accordance with the following policies:

- Grant funding shall be pursued and used to finance the capital budget whenever possible.
- Capital projects for any business-type operation shall be financed solely from the operation's revenues.
- Major capital projects, such as new construction or major renovations to existing facilities, may be accomplished through capital or debt exclusions.
- Infrastructure or facility maintenance budgets built into the general operating budget will not be reduced to fund other departmental budgets.

#### E. Capital Project Closeouts

The City will endeavor to complete approved capital projects within eighteen months of City Council authorization and to close out all capital projects within six months of completion. As these projects are closed out, the Finance Director will do the following:

- For bonded projects with residual balances, the Finance Director will propose reallocating any balances for other capital projects as well as proposing to rescind any unused borrowing capacity.

- For projects funded with available revenue (tax levy or reserves) having residual balances, the Finance Director will propose reallocating the balances for other capital projects or close the balances to the appropriate fund surplus.

EFFECTIVE DATE

This policy was approved by the Mayor-April 2017

**Appendix 3: Online Capital Request Form**

Pittsfield CIP Capital Needs Assessment for FY22- FY26 CIP

Capital Project Request Form

Please fill out a new form for each proposed project.

1. Please provide your name and preferred contact method.

Name

Email Address

Phone Number

2. Department

3. Proposed Project Name

4. Project Location (Street, Building, Floor, etc.)

5. Priority - High Priority = 1 - Low Priority = 5

This is not a ranking of projects. You may have more than one project with the same priority. This is also not an indication of urgency. High priority projects may be scheduled for later years.

1

2

3

4

5

6. Project Description (1-3 sentences): Describe name/make/model of item to be purchased and what, if anything, is being replaced. Describe extent of work to be done on facilities projects. Indicate if project will require consulting or design work.

7. Project Justification: Describe why the project is necessary. Justification may include the condition of the existing asset, financial savings, number of people impacted, environmental sustainability, public safety, expanded learning or recreational opportunities, or ADA compliance, to name a few.

8. Does the project serve an under-served population (including environmental justice populations) or meet an unmet need in the community? For example, expansion of transportation services for seniors or a neighborhood's first playground.

- Yes
- No
- Maybe

If yes, please provide an explanation.

9. Should the project be combined or coincide with another project?

- Yes
- No

If yes, which project(s)?

10. Please indicate the project costs by year.

FY2022	<input type="text"/>
FY2023	<input type="text"/>
FY2024	<input type="text"/>
FY2025	<input type="text"/>
FY2026	<input type="text"/>

11. Is there a grant or alternative funding source available for this project? How likely is it that a grant will be received?

- Very likely to get grant, or it's already been received
- Somewhat likely to get grant
- Small chance to get grant
- I have no idea

Please specify grant name and program type (State, Federal, Private, etc.) and provide any additional details you know about the grant (for example, max award, matching requirements, etc.)

12. Will the project have an impact on the operating budget? An example would be avoiding repair costs by replacing an old vehicle. Another example is paying a driver for a new transport van.

- Yes, the project will impact the operating budget
- No, the project will not impact the operating budget
- I don't know

If yes, please explain the impact on the operating budget, indicating whether the project will save more or cost money.

13. If you have any documentation related to this project, such as price quotes, specs, or photos, please upload. Max 4 uploads.
