Your Drinking Water and COVID-19:

Residents of Pittsfield, as well as those from the towns of Dalton, Lenox and Lanesborough, who receive drinking water from the City of Pittsfield do not need to worry. The virus is not in your water, and the City of Pittsfield’s Department of Public Services & Utilities will continue to reliably provide water that meets all health standards.

If you are worried about being quarantined, stock up on medicine and food, but you do not need to buy bottled water.

The City of Pittsfield is dedicated to provide this critical service to our community even during public health emergencies. Federal and state regulations require that we have emergency plans to maintain operations during a variety of different types of emergencies and we are prepared to do so.

For more information, please visit the Coronavirus and Drinking Water and Wastewater FAQs page by the U.S. Environmental Protection Agency (EPA).

If you have any questions or concerns, please contact 413-499-9333.
